

THE NEW MINI COUNTRYMAN.

ALL-ELECTRIC. CHARGING.

The All-Electric MINI Countryman includes a Mode 3 Charging Cable for public charging and the MINI Charging Card as standard, granting you access to the continuously expanding public charging network. If you wish to charge your MINI at home, the optional Mode 2 Flexible Fast Charging Cable with 3-pin plug can be purchased, or you have the option to install a Wallbox with our partner [Pod Point](#). A guide to charging times and rates are below, these are dependent on the local electricity infrastructure.

| TYPE | RATE | E (hrs:mins) | SE ALL4 (hrs:mins) |
|---|-------|--------------|--------------------|
| HOME CHARGING (AC 0-100%) | | | |
| Charging with Mode 2 cable (Flexible Fast Charger with 3-pin plug) | 2.3kW | 34:30 | 34:30 |
| Charging with Wallbox | 7.4kW | 10:00 | 10:00 |
| PUBLIC CHARGING (AC 0-100%/DC 10-80%) | | | |
| AC charging with Mode 3 cable | 11kW | 06:30 | 06:30 |
| DC charging at max charge rate | 130kW | 00:29 | 00:29 |

May 2024.

* = The All-Electric MINI Countryman is a battery electric vehicle requiring mains electricity for charging. Whilst we recommend the battery for this vehicle is charged to 80% to help optimise the life of your battery, the electric range figure shown is the WLTP figure after the battery had been fully charged to 100%. WLTP figures are shown for comparability purposes. Only compare fuel consumption, CO₂ and electric range figures with other cars tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including the starting charge of the battery, accessories fitted (post registration), variations in weather, driving styles and vehicle load. WLTP has been used as the applicable CO₂ figure from 1 January 2024 for vehicle registration tax (VRT).

BIG LOVE.
